Big Volume

Built Tough

Welcome to Ballistic Mobile Pty Ltd.
The Linehaul™ R247 is the worlds first 3G 850/2100 UMTS / HSDPA fixed in vehicle phone.
Fully designed, engineered and proudly built here in Australia, the Linehaul™ R247 brings back simple ease of use like the good old days.
Features designed to meet the demands of owner, corporate and fleet operators. Strength unrivalled in a mobile handset, a large rubber keypad for easy navigation, an enormous screen boasting large character sizes customisable from a 1,2 or 3 line display.
A menu system that's logical and easy to navigate and best of all, it's big on volume, offering excellent inbound and outbound audio qualities.

Auto adjusting backlight

The customisable auto adjusting backlight allows the user to set screen and keypad brightness. With the Auto Idle setting you can have the the keypad and /or the screen set to different brightness levels when the phone is active and have it automatically reduce to a subtle glow when idle. No more bright lights at night time.

Easy to use menu

The phone menu has a simple logical format, customisation of the phone has been made simple by a well planned and layed out menu structure.

Multiple Size Fonts

The phones unique multiple font selection makes the LCD display more easily read for varying degrees of sight and visual distance. Change the screen from 3 ,2 or even single line display.

Dual Sim Card

Dual Sim Card slots allow the user to insert their personal Sim Card together with the company / corporate one.

Fixed in Vehicle

Contact your driver / vehicle when you need. It never goes flat and it never gets left at home.
